Notice Concerning the Issuance of Stock Options (Stock Acquisition Rights for Employees) to Officers of MISUMI Group Inc. as a Medium-term Incentive

MISUMI Group Inc. (the Company) announces that at a Board of Directors meeting held on October 23, 2014, it has decided to issue stock acquisition rights to officers of the Company as follows, in accordance with Articles 238 & 240 of the Companies Act.

(1) Reason for Issuing Stock Acquisition Rights as Stock Options

To enhance incentives for the 58 of the Company's officers .

(2) Total Number of Stock Acquisition Rights

391 rights. (100 of the Company's common shares per each stock acquisition right) When the number of shares adjusted is as defined in (3) below, the above total number of stock acquisition rights shall be adjusted similarly.

Note that the above total number of stock acquisition rights represents the total number of rights to be allocated. In the event that any of those eligible to receive rights do not apply for those rights or for any other reason the total number of share acquisition rights is reduced, the total number of share acquisition rights shall be modified to reflect the total number of rights actually allocated.

(3) Type and Number of Shares Subject to the Stock Acquisition Rights

The number of the Company's common shares subject to each stock acquisition right (Number of Shares to be Granted) shall be 100 shares per right. Therefore, the number of shares subject to all stock acquisition rights shall be 39,100 in total initially.

However, on or after the date the stock acquisition rights are allotted (Allotment Date) should the Company's common shares be split or consolidated (reverse split), the Number of Shares to be Granted shall be adjusted based on the following formula. The adjustment in question will apply only to stock acquisition rights yet to be exercised as of the relevant time. Fractions of shares resulting from application of the formula shall be discarded.

$$\text{Adjusted Number of Shares to be Granted} = \text{Number of Shares to be Granted (before adjustment)} \times \text{Ratio of split (or reverse split) of shares}$$

Furthermore, if on or after the Allotment Date the Company undergoes a merger or a business entity is spun off, if shares are allocated without compensation, or if any other event occurs that necessitates adjustment to the Number of Shares to be Granted, the Company may adjust the Number of Shares to be Granted within a rational range after considering matters such as the terms of events including merger or spin-off of a business entity. Fractions of shares resulting from such adjustments shall be discarded.

(4) Monetary Value of Assets to be Contributed Upon Exercise of the Stock Acquisition Rights

Stock acquisition rights are to be exercised in lieu of a cash investment. The monetary value of assets to be contributed for the exercise of one stock acquisition right is the amount obtained by multiplying the Number of Shares to be Granted by the price per share (Exercise Price). The Exercise Price shall be one yen per share.

If after the Allotment Date the Company's shares are split or consolidated (reverse split), the treatment found to be necessary by the Company shall be applied in the event an adjustment to the Exercise Price is deemed appropriate.

(5) Amount to be Paid in for the Stock Acquisition Rights

The Company would provide these stock acquisition rights as compensation of an amount equivalent to the paid-in amount to those receiving an allocation of stock acquisitions rights (Rights Recipient). A Rights Recipient would acquire the stock acquisition rights by offsetting the right to seek compensation with the paid-in amount for the stock acquisition rights. This issuance does not qualify as a discounted issuance.

Said stock acquisition rights shall be granted in accordance with conditions documented in the agreement, plan or other document concluded at the time of the relevant Corporate Reorganization if said agreement, plan or other document concluded at the time of the relevant corporate reorganization does indeed set forth such conditions.
